

Ultrafast Soft Recovery Diode

60A 600V trr ~ 32 ns

Features

Ultrafast Recovery
 175°C operating junction temperature
 Designed and qualified for industrial level

Benefits

Reduced RFI and EMI
 Higher frequency operation
 Reduced snubbing
 Reduced part count

Description/Applications

These diodes are optimized to reduce losses and EMI/RFI in high frequency power conditioning system. The softness of the recovery eliminates the need for a snubber in most applications. These devices are ideally suited for HF welding power converters and other applications where switching losses are not significant portion of the total losses.
